Full service interior architecture and design; Design intelligence; Sustainability and wellness; Lighting design

The American Express Centurion Lounge at Dallas-Fort Worth Airport (DFW) includes a spa, conference and business center, food, beverage, and bar amenities, and a variety of comfortable and technology equipped seating areas. The lounge benefits from an abundance of natural light with a floor to ceiling glass curtain wall that overlooks the entrance and ticketing terminal.

This is the first location to incorporate a concourse-level entrance design, featuring a full graphic façade of enameled metal panels leading up to a lacquered wood screen entrance.
